

ProductLine Overview

J.T.Baker® High Purity Solvents and Reagents – ULTRA RESI-ANALYZED™ Environmental Solvents and Reagents

J.T.Baker brand chemicals and reagents help you optimize your performance providing application-optimized and function tested, J.T.Baker products that will enhance the separation power and reproducibility.

The Avantor™ high purity solvents and reagents will give you the performance you need with minimal risk of contaminants that can limit accuracy and productivity and maximize the sensitivity and detecting power of your instrumentation:

ULTRA RESI-ANALYZED Solvents and Reagents Advantages

- Unique stabilizer systems provide unmatched product stability and interference-free results when chemical requires
- Optimized distillation targeted to remove reactive impurities, production of higher assays and narrow solvent fronts
- Performance tested to purity levels below the Lower Limits of Quantitation (LLQ) for trace analyte detection

About Avantor™ Performance Materials

Avantor Performance Materials manufactures and markets high-performance chemistries and materials around the world under several respected brand names, including the J.T.Baker $^{\circ}$, Macron Fine Chemicals $^{\infty}$, Rankem $^{\infty}$, Diagnova $^{\infty}$, BeneSphera $^{\infty}$, and POCH $^{\infty}$ brands.

Avantor products are used in a wide range of industries. Our biomedical and life science solutions are used in academic, industry and quality control laboratories for research, pharmaceutical production and medical lab testing, while our electronics solutions are used in the manufacturing of semiconductors and flat panel displays. Based in Center Valley, Pennsylvania (USA), Avantor is owned by an affiliate of New Mountain Capital, LLC.
